10-BA	Basswood Sawlogs	MBF	13.00	300.00	3,900.00
Total estimated value of accepted bid					101,543.25

Cutting Instructions:

Contract available for inspection

1. Cut all ironwood, all merchantable aspen, all merchantable white birch, and orange paint marked trees. Cut only orange paint marked trees within the restricted equipment zones (REZ's). Snags and dead trees are only to be cut if leaving them standing presents a safety hazard to the harvesting operation.
2. All logging damage/debris must be corrected/removed from trails, woods roads, and grass openings daily and prior to sale closure.
3. Any roadwork will require prior approval of the Forestry Department and will follow BMP guidelines. Contractor is responsible for installing water bars and/or using other soil stabilizing techniques where appropriate.
4. Logging activity is prohibited from April 15 to July 15 to reduce the risk of introducing and/or spreading oak wilt.
5. Wheeled or tracked equipment is prohibited in the restricted equipment zone (REZ) unless agreed upon in writing. Biomass harvesting is prohibited within the REZ.
6. Permission must be granted by the Forestry Department to use the snowmobile trail from December 1 to March 31. Ample snow cover must be maintained to allow safe snowmobile operation.
7. Special care must be taken to not damage or disturb survey markers.
8. Special care must be taken to limit damage to advanced regeneration. In order to protect advanced regeneration, whole tree skidding with tops attached is subject to field approval.
9. Garlic mustard was found on some of the woods roads leading to and within this sale (see map). Soil disturbances must be kept to a minimum, and areas that have garlic mustard must be harvested last in order to help slow the spread of invasive species.
10. Mixed hardwood pulp weight estimate is approximately 6% white birch pulp and less than 1% aspen pulp. Mixed hardwood log estimate is approximately 13% sugar maple, 18% red maple, 66% white ash, and 2% white birch.
