Cutting Instructions:

Contract available for inspection

1. Selection harvest area: cut all ironwood, all merchantable aspen, all merchantable white birch, and orange paint marked trees. Clearcut area: cut all living trees greater than 1 inch in diameter except for oak, butternut, black ash, spruce, tamarack, pine, cedar, cherry, and hemlock. Do not residual cut non-merchantable trees in low wet areas and drainages. Snags and dead trees are only to be cut if leaving them standing presents a safety hazard to the harvesting operation.
2. All logging damage/debris must be corrected/removed from trails, woods roads, and grass openings daily and prior to sale closure.
3. Any roadwork will require prior approval of the Forestry Department and will follow BMP guidelines. Contractor is responsible for installing water bars and/or using other soil stabilizing techniques where appropriate.
4. Gates/berms removed or damaged by contractor must be restored to original or better condition when sale becomes inactive and upon completion.
5. In order to protect advanced regeneration, whole tree skidding with tops attached is subject to field approval.
6. Mixed hardwood pulp weight includes approximately 65% white birch, 3% aspen, 2% red oak, and 2% hickory. Mixed hardwood sawlog volume includes approximately 61% white birch, 21% ash, 12% basswood, 4% soft maple, 1% red oak, and less than 1% sugar maple and hickory.
