**Cutting Instructions:**

Contract available for inspection

1. Selection harvest area: cut all ironwood, all merchantable balsam fir and orange paint marked trees. Seed tree harvest area: cut all living trees greater than 1 inch in diameter except for pine, cedar, hemlock and yellow paint marked trees. Snags and dead trees are only to be cut if leaving them standing presents a safety hazard to the harvesting operation.
2. All logging damage/debris must be corrected/removed from trails, woods roads, and grass openings daily and prior to sale closure.
3. Any roadwork will require prior approval of the Forestry Department and will follow BMP guidelines. Contractor is responsible for installing water bars and/or using other soil stabilizing techniques where appropriate.
4. Ingress and egress to this sale is the responsibility of the contractor.
5. In order to protect advanced regeneration, whole tree skidding with tops attached within the selection harvest area will be subject to field approval.
6. Special care must be taken to limit damage to advanced regeneration.
7. Mixed hardwood pulp weight estimate is approximately 6% white birch and less than 1% aspen. Mixed hardwood sawlog volume estimate is approximately 83% basswood and 16% white birch.
