CONTRACT AVAILABLE FOR INSPECTION

- 1) Selection harvest area: cut all ironwood, all balsam fir, orange paint marked trees, and all trees inside of the delineated canopy gaps. Canopy gaps are delineated by purple paint marked trees located on the gap's perimeter. A purple V faces the inside of the canopy gap. Avoid damage to residual trees. Do not cut Red, Yellow, Blue or Purple paint marked trees. Snags and dead trees are only to be cut if leaving them standing presents a safety hazard to the harvesting operation. Snags and dead trees cut for safety reasons must be left in the harvest area and may not be utilized. Short-wood skidding only.
- 2) Garlic Mustard has been found on the ATV trail and woods road system (See map). To help prevent the spread of garlic mustard, ground disturbance must be kept to a minimum in these areas. These areas must be cut last. Contractor must wash equipment prior to leaving the sale area.
- 3) Wheeled or tracked equipment is prohibited in the restricted equipment zone (REZ), unless agreed upon in writing. Biomass harvesting within the REZ is prohibited.
- 4) Do not operate equipment within 15 feet of the Ordinary High Water Mark (OHWM), streams, ephemeral ponds, and wetlands unless the ground is firm or frozen. Do not operate equipment within 15 feet of lakes.
- 5) Permission must be granted by the Forestry Department to use the snowmobile trail from December 1 to March 31. Ample snow cover must be maintained to allow safe snowmobile operation.
- 6) Gates/Berms removed or damaged by the contractor must be restored to original or better condition when the sale becomes inactive and upon sale completion.
- 7) All logging damage/debris must be corrected/removed from trails, woods roads, and grass openings daily and prior to sale closure. Slash will be left where it falls unless the contractor wishes to use it to prevent ruts, soil compaction and erosion during logging operations.
- 8) Any roadwork will require prior approval from the Lincoln County Forestry Department and must follow BMP guidelines. Contractor is responsible for installing broad based dips, water bars and/or using other soil stabilizing techniques where appropriate.
- 9) Ingress and egress to this sale is the responsibility of the contractor.
- 10) Special care must be taken to limit damage to saplings. All spring poles (saplings tipped over from harvesting operations) will be cut at the base.
- 11) Special care must be taken to not damage or disturb survey markers.
- 12) Mixed hardwood pulp weight estimate is approximately: 2% birch. Mixed hardwood sawlog volume estimate is approximately: 70% white ash, 20% red maple, and 9% black ash. Hard maple sawlog volume estimate is approximately: 15% red oak.
- 13) 3 year contract
