**Contract Available For Inspection**

- 1) Clear cut area: cut all living trees greater than 1 inch in diameter except for oak, butternut, spruce, tamarack, pine, cedar, cherry, hemlock, apple, hawthorn, non-merchantable balsam fir, and yellow paint marked trees. Do not residual cut non-merchantable trees in low wet areas and drainages. Selection harvest area: cut all ironwood, and orange paint marked trees. Snags and dead trees are only to be cut if leaving them standing presents a safety hazard to the harvesting operation.
- 2) All logging damage/debris must be corrected/removed from trails, woods roads, and grass openings daily and prior to sale closure.
- 3) Any roadwork will require prior approval of the Lincoln County Forestry Department and will follow BMP guidelines. Contractor is responsible for installing water bars and/or using other soil stabilizing techniques where appropriate.
- 4) Ingress and egress to this sale is the responsibility of the contractor.
- 5) Contractor is responsible for obtaining permission to cross private property.
- 6) Special care must be taken to not damage or disturb survey markers.
- 7) In order to maximize vegetative regeneration the clear cut area must be harvested between September 15th and May 1st.
- 8) In order to protect advanced regeneration whole tree skidding with tops attached will be subject to field approval in the selection harvest area.
- 9) Special care must be taken to limit damage to advanced regeneration in the selection harvest area.
- 10) Mixed hardwood sawlog volume estimate is approximately 96% red maple, 2% black ash, and 1% white ash. Hard maple sawlog volume estimate is approximately 33% black cherry.
