# Weekly Number of Positive COVID-19 Tests Compared to Total Weekly Tests in Lincoln County

Data from the Wisconsin Electronic Disease Surveillance System

## COVID-19 Disease Activity

	Case Activity	CLI Activity	ILI Activity
Wisconsin	Very high	Medium	Low
Lincoln	Very high	Very high	Low

Updated: 9/30/2020

In Lincoln between 9/16/2020 - 9/29/2020, the case activity level is Very high.

This page shows information on case burden (rate per 100,000) and trajectory (percent case change). Case activity is a combination of burden and trajectory. For definitions of burden, trajectory, and disease activity levels, see below "About our data: How we measure case activity". Confirmed case activity is an important starting metric to understand current COVID-19 levels in your community. For additional information beyond cases, look at the COVID-like illness (CLI) and influenza-like illness (ILI) sections which provide more insight into the levels of respiratory illness in your community.

Two Week Range: 9/16/2020 - 9/29/2020

Activity Indicator: Case Activity (selected), CLI Activity, ILI Activity

View Type: County View (selected), Region View

### Case activity level by county (last two weeks)

Each square represents a county

Burden	Trajectory	Activity Level
Very high	Growing	Very high
Very high	No significant change	High
Very high	Shrinking	Medium
High	Growing	High
High	No significant change	Medium
High	Shrinking	Low
Moderately High	No significant change	Low

### Lincoln County data (last two weeks)

Activity	Burden (per 100,000)	Trajectory	Cases over time
Very high	436.0 (Very high)	52% ▲	Bar chart showing cases from 9/20 to 9/30
