Type of Project: New Project Replacement Project Continuation

Project Description/Scope (provide a brief 1-2 paragraph) description: Pulverize & Pave 2.7 miles of CTH A from USH 51 to CTH A North

Project Purpose(s) – check all that apply and please explain below:

- The Project is required to meet legal, mandated or contractual obligations
- Project will result in the protection of life and/or property and maintain or improve public health and safety
- The project will result in reductions in expenditures

- Project will benefit and/or be utilized by other Lincoln County Departments
- The project is consistent with an overall County plan, policy, or goal; and is necessary to complete a project that has begun or under construction

Alternatives: *What alternative measures have been taken to address this need/issue/problem? Are there solutions other than adding a new project that have been utilized or considered?*

Chip sealed and crack filled. This County Highway has a very low rating that shows it needs reconstruction.

Outcomes/Measureable Results: *What specific outcomes are expected with this project? Describe in detail what performance measures will be used to measure the impact of the new project. How do the proposed measures compare to current measures, if different?*

Type of Project: New Project Replacement Project Continuation

Project Description/Scope (provide a brief 1-2 paragraph) description: Design and build a new Highway Department office and shop located in Merrill and Tomahawk

Project Purpose(s) – check all that apply and please explain below:

- The Project is required to meet legal, mandated or contractual obligations
- Project will result in the protection of life and/or property and maintain or improve public health and safety
- The project will result in reductions in expenditures
- The project will result in a positive return for Lincoln County
- Repairs, rehabilitates or replaces an important existing physically deteriorated or functionally obsolete county facility, system, service or equipment
- Provides a new service, facility, system or equipment
- Project would generate sufficient revenues to be essentially self-supporting in its operation
- Project would make existing facilities or personnel more efficient or increase their use with minimal or no operating cost increase
- Project will benefit and/or be utilized by other Lincoln County Departments
- The project is consistent with an overall County plan, policy, or goal; and is necessary to complete a project that has begun or under construction

Explanation from above: The current building are becoming very costly to repair. Both facilities are unable to house the current equipment we have and we are in need to purchase more. Rehabbing both Tomahawk and Merrill facilities @\$15,000,000-\$18,000,000 is less expensive than relocating to one facility @ the forestry site off CTH K which would cost approx. \$25,000,000.

Alternatives: *What alternative measures have been taken to address this need/issue/problem? Are there solutions other than adding a new project that have been utilized or considered?*

We have been making repairs as needed in order to continue operations. Due to age, repairs are turning into construction projects. Safety is a major concern to all employees using the current facilities.

Outcomes/Measureable Results: *What specific outcomes are expected with this project? Describe in detail what performance measures will be used to measure the impact of the new project. How do the proposed measures compare to current measures, if different?*

New building will help storage and maintenance of equipment. Make winter road maintenance more efficient and safe.

Previous Action:

Maintenance in buildings as needed.
